EDUCATION

National Institute of Technology, Puducherry <i>Bachelor of Technology in Computer Science and Engineering</i>	Puducherry, India Aug. 2025 – Present
Vivekananda CBSE School <i>Higher Secondary Certificate (Class XII, CBSE) PCM CGPA: 9.4/10</i>	Puducherry, India July 2022 – May 2024

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern Internship Certificate <i>Tynari (Formerly Printeest)</i>	Apr. 2026 – Jun. 2026 <i>Remote</i>
- Designed and developed a full-stack Niche Generator tool enabling sellers to discover 50+ product and market opportunities, directly integrated into the platform's seller dashboard - Built and deployed a Chrome Extension with AI capabilities connected to platform backend services, reducing manual seller workflows by an estimated 40% - Architected and implemented the backend database schema for a product catalogue supporting 1000+ SKUs, ensuring a scalable, well-organised structure with optimized query performance - Contributed to performance optimisation, debugging, and code quality improvements across the codebase, resolving 15+ bugs and improving overall system stability	
Development Intern Letter of Recommendation <i>Brand Labs Ventures LLP</i>	Jan. 2026 – Apr. 2026 <i>Remote</i>
- Engineered 10+ production-grade RESTful APIs using FastAPI and Python, powering user authentication, data management, and core product workflows with sub-200ms response times - Unified file handling, data pipelines, and 3 third-party service integrations into a single full-stack workflow, eliminating cross-team handoff delays - Automated data ingestion pipelines in Python to fetch, validate, and store data from 5+ external sources, reducing manual processing time by an estimated 60%	

TECHNICAL PROJECTS

DevShowcase – Dev Project Discovery Platform Node.js, Express.js, PostgreSQL, React Live GitHub
- Launched a full-stack developer community platform supporting project publishing, commenting, and upvoting, used by 150+ beta testers with zero critical post-launch bugs - Architected 15+ RESTful API endpoints handling 100+ projects and 300+ comments, with Prisma ORM queries optimized to reduce average DB response time by 40% - Secured all API routes with JWT authentication and role-based access control, eliminating unauthorized access across all tested attack vectors - Resolved 20+ edge-case bugs during beta testing with 150 users, achieving stable production performance before public release
AI Personal Agent – On-Device Task Automation System Python, FastAPI, AsyncIO, ReAct GitHub
- Engineered a modular AI agent system leveraging a ReAct-style reasoning loop to interpret natural language commands and execute 15+ real-world task types autonomously - Implemented an async task scheduler with SQLite-backed persistence, enabling delayed execution and notification delivery that survived process restarts without data loss - Built a plug-and-play tool routing layer integrating email, alarms, and web search – reducing time to add a new external service from hours to under 30 minutes

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C, SQL
Web Technologies: HTML, CSS, React.js, Node.js, Express.js, REST APIs, JWT Authentication
Frameworks & Libraries: FastAPI, Prisma ORM, Playwright, scikit-learn, AsyncIO
Databases: PostgreSQL, MongoDB, SQLite, Neon Database
Tools & Platforms: Git, GitHub, Postman, Docker, Vercel, Railway, VS Code, CI/CD
Core Competencies: Data Structures & Algorithms, Object-Oriented Programming, Full-Stack Development, API Development, Web Scraping, LLM Integration
